

CHAFER INSTRUCTIONS

Chafing Dish (with Sterno)

1. Do not use anything but Sterno type fuel in the burner.
2. Do not put unit on hot stove or an open flame.
3. NEVER light the burner unit before pouring liquid into the water pan, urn or kettle body. Low flame is sufficient to maintain proper heat.
4. Stainless steel food pans can be used for cooking and placed in the oven to keep food hot.
5. Chafing dish water pans should be filled with hot water. Check water level in pans throughout use. **Do not use without water.**

Use of Sterno

1. Pry the lid off the Sterno container and set container in the heat cup beneath. Light Sterno and adjust lid about ½ across container.
2. We recommend some type of barrier be placed between the heating element and the surface of the table to avoid heat damage to linens or surfaces. A small dish is generally sufficient.

Cleaning Instructions

Return all chafers and urns emptied, with food scraped off.
